LIM335 Maruleng - Supporting Table SC1 Material variance explanations - M03 - September

Ref	Description R thousands	Variance	Reasons for material deviations	Remedial or corrective steps/remarks
1	<b>Revenue</b>			
	Service charges - electricity revenue		The billing for July 2023 will go through during August 2023 hence the variance.	At the last date of every month due to the number of meters that need to be read and, more importantly, the bulk meters are only read either on the last day of a month or the first day of a new month.
	Interest Earned - external investments		The variance is a result of the timing of the Investment journals captured on the system. The bank statements are received on the 1st of each month, and interest is then captured onto the financial system.	
	Transfers and subsidies		1st tranche of Equitable Share received. The variance is due to the timing of grant receipts.	
2	<b>Expenditure By Type</b>			
	Employee related costs		The variance is attributable to timing of service related benefit payments and vacant posts anticipated to be filled.	Vacancies to be filled during the current financial year.
	Debt impairment		Journals are done at year end. This is a non-cash provision that is normally calculated at the year end.	
	Depreciation & asset impairment		Included in this is the 1Um for asset impairment which is calculated at year end.	
	Bulk purchases		Timing of the payments to eskom.	Variance attributable to timing of payment of ESKOM invoice which is normally paid the following month after the service is received.
	Contracted services		Timing of payments.	
3	<b>Capital Expenditure</b>			
	Finance and Administration			
	Community and public safety			
	Energy Sources
